←DK-G03EX

Your choice when needing a mobile, compact yet powerful wheel washer. The price-interesting solution for rental at construction sites

←CONVEYOR TANK

Water tank with sludge conveyor for the removal of big volumes of heavy soiling. Stand-alone or in combination with a Cycleclean/GWC-water treatment plant. Also interesting to implement in your vehicle washing area.

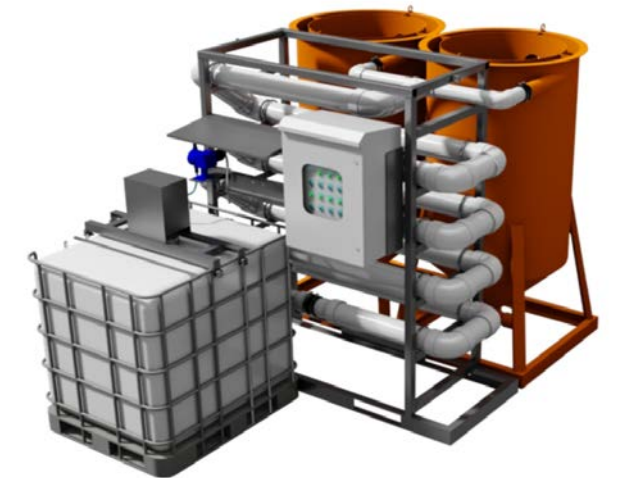

DK-GRATING→

Most valued wheel washer in many countries because of its ingenious all-in-one design with automatic sludge removal, built-in Stainless steel filtering system and extreme power output up to 30 kW for the toughest of applications. The rental unit of your choice when exiting heavily soiled construction sites.

CYCLEAN→

Compact plant with Cyclone-technology and automatic flocculant dosing unit. Available in 10 to 40 m³/h water treatment capacity.

←DK-BRIDGE

The drive-through wheel washer for heavy soiling in combination with high traffic volumes. Fully galvanized unit of which length, width, number of nozzles and pump power output all are adaptable to your specific needs. Very interesting in combination with a Cycleclean/GWC-plant.

←GWC

Top of the range model for continuous use at treatment rates up to 80 m³/h. Also available with pre-cyclone settlement tank for the purest water results.
